EDUCATIONAL PROGRAM

THE MOST EXCITING PROGRAM EVER!

DROUGHT!

DISASTERS!

Insect Infestations!

OSHA Fines!

SHRINKAGE!

At the core of GEAPS' Exchange program is a timely and topical slate of sessions planned and produced by the Educational Programming Committee (EPC). Led by Ed Zdrojewski of Grain Journal, the EPC is made up of industry professionals—GEAPS members who not only plan the program, but know the issues confronting the industry today.

Most sessions are concurrent presentations as shown on pages 8-9. You can customize your own slate of sessions to best meet your specific needs. With more than 30 hours of focused education programs over three days, there are a lot of options to choose from.

In addition to the hour-long sessions, don't miss the other educational offerings. This year's Opening Workshop will concentrate on avoiding disasters like grain dust explosions. The Idea Exchange will offer 13 six-minute presentations on ideas and equipment new to the industry. For a more hands-on experience, check out the Expo Pods, focused on various grain testing equipment.

EXPO PODS

Grain Testing Equipment

Monday, Feb. 25, 10–10:45 a.m. & 1:45–2:30 p.m.
Tuesday, Feb. 26, 10:30–11:15 a.m.

The 2013 Expo Pods will feature a series of equipment-oriented sessions covering topics related to the use and maintenance of grain testing equipment. Presentations will include information and demonstrations on new moisture meters, test kits for grain toxins and GMOs, grain inspection equipment, dockage testers and in-line grain analyzers.

There will be 12 different sessions in four pods located in the Expo Hall—eight on Monday, Feb. 25, and four Tuesday, Feb. 26—all during regular Expo Hall hours.

The pods are curtained-off areas in the Expo Hall, and offer equipment demonstrations for small groups of people. They provide up-close, hands-on learning opportunities. No PowerPoint!

Pod numbers correspond with labels on Expo Hall map (pages 16-17).
